

P&O Maritime is a diverse global company in the marine transport sector delivering innovative and sustainable solutions in partnership with our customers. With a strong focus on business growth and excellence, P&O's operations span Australasia, South America, Europe, Middle East and Africa.

The Technical Manager is responsible for the technical performance of all vessels under P&O Maritime management, the management of vessels dockings, builds, modifications, as well as the development of technical project solutions.

Reporting to the General Manager – UAE based in Dubai, United Arab Emirates.

Key responsibilities are but not limited to :

- Develop budget plans for sign off by GM, in line with BU's objectives and Company financial policies and procedures
- Develop and recommend technical solution strategy in consultation with GM
- Develop Systems: planning and closed loop in accordance with Company standards
- Identify and assess vessels (existing vessels or new designs) for suitability to customer / P&O Maritime requirements
- Develop technical solution options (that meet relevant class requirements pre and post vessel modification) and recommend solution position to GM
- Develop specification for shipyard appraisal and quote for vessel builds, modifications and dockings
- Identify and recommend shipyard options for execution of technical solution
- Management of the Technical Team's input to new projects, tenders and contract renewals for projects and presentation for final sign off on technical costs for such projects.
- Maintain Docking reports with total costs and the works undertaken during the docking.

To be considered for this position, the candidate must possess the following qualifications:

- Minimum STCW95 Certificate of Competency as Marine Engineer Class 1 (MOTOR)
- Tertiary qualifications in Marine/Civil Engineering, Chief Engineer certificates (or equivalent) or Naval Architecture qualification and experience
- Excellent communication and liaison skills in a maritime-related environment with complex customer requirements demanding intuition, innovation and flexibility
- High level project or management capability covering marine engineering, ship management and ship operations.
- Demonstrated ability to develop technical solutions to satisfy stakeholder objectives and deliver those solutions
- Skills and proficiency in MS Project, Word, Excel or equivalent applications

The employment benefits package is reflective of the market and location. A competitive salary package commensurate with the successful applicant's skills and experience will be offered.
